

The Future of Indonesia's Digital Infrastructure

TOWR.JK x WIFI.JK

FFIC Acquisition Proposal

Proposed by: Odyssey Capital

Darell MT

Mishell L

Gloria CK

Acquire 51% of WIFI – a fair value, value-creating entry into convergence

PROCEED

Acquire a 51% controlling stake in WIFI at Rp3,619/share

TOWR's platform for fixed-mobile convergence

Controlling Stake

51%

Offer Price

Rp3,619

Premium

+73.2%

Funding (Debt/Equity)

60 | 40

Deal NPV

Rp18.1 tn

Strategic Fit

5 layers

1. Passive Towers
2. Fibre/Backhaul & Transport
3. FWA – Fixed Wireless Access
4. FTTH – Fibre to the home
5. Consumer Services & Advertising

Value Creation

Rp4.1 tn

- Rp425 bn run-rate synergies – revenue, cost and financing
- Synergy NPV exceeds the premium, +Rp838bn net value created.

Returns

33.9% IRR

- Rp17.9tn NPV, capital recovered in 4.1 years
- +25.8pp above the 8.1% WACC hurdle, EPS accretive from 2028

Downside

16.6% floor

- NPV-Positive in every stress case
- Leverage 4.07x → 4.19x; 0.94x covenant headroom

RECOMMENDED ACTION

Approve the acquisition at Rp3,619 (60/40 debt-equity)

KEY TAKEAWAY

Strategically transformative, accretive by 2028 and downside-protected, deal still creates net value after paying the control premium, at a 33.9% IRR

The largest structural MNO industry transformation in a decade is forcing industry value to shift toward FTTH infrastructure.

The number of mobile operators collapsed from 5 to 3 nationwide players (Telkomsel, IOH, XLSmart) by 2025.

The XL and Smartfren merger in April 2025 was the biggest telco M&A in Southeast Asia. The influence towards TOWR :

- XLSmart merger value: \$6.5B – largest telco M&A in Southeast Asia
- Overlapping sites: 20–25% will be rationalized (not yet done because of long term leasing contracts)
- TOWR (Protelindo) exposure: ~32% revenue from XL/Smartfren

The value chain is divided into 3 layers: (1) Operators/MNOs, (2) Tower & fiber infrastructure providers, and (3) Suppliers & contractors.

This shrinking customer base at the core triggers the **decommissioning of redundant assets** and contract **renegotiations**, as 3 buyers now hold the negotiating leverage that was once divided among 5.

Capital expenditure (capex) from operators has become **highly selective**, prioritizing capability and efficiency over simple network expansion.

The FBB sector offers a strategic hedge against shrinking MNOs through direct exposure to millions of retail households.

- Market Landscape: IndiHome dominates (~67% share), leaving ample room for independent challengers like WIFI to capture underserved segments.
- Pricing Power: Unlike pure-play towers losing MNO leverage, FBB players hold strong pricing control by directly serving millions of retail households.
- Growth Runway: Indonesia's ~21% FBB penetration lags regional peers (~52%), offering a massive structural runway for long-term organic expansion.

FBB Penetration (SEA)

Layer 1: The Source of Demand – Mobile Network Operators (MNOs)

Demand & Pricing Pressure: Entirely dependent on Layer 2 CAPEX/OPEX. As tower companies delay expansions and slash maintenance costs, contractor revenues shrink in parallel, acting as the ultimate shock absorbers of the industry's consolidation.

M&A execution demands strict mitigation of OJK/KPPU thresholds, FX exposure, and related-party transaction (RPT).

Macroeconomic & Currency Dynamics

Infrastructure providers operate within a structural currency mismatch; their recurring lease revenues are entirely denominated in IDR, while network expansion and capital expenditures (CAPEX) rely heavily on USD.

This dynamic makes margins highly sensitive to currency fluctuations, necessitating rigorous FX management and hedging strategies to maintain financial stability.

Technological Evolution (Starlink & FWA)

The connectivity landscape is rapidly shifting due to the deployment of Low Earth Orbit (LEO) satellites (such as Starlink) and the expansion of Fixed Wireless Access (FWA), providing alternatives to traditional cellular towers.

To future-proof their business, infrastructure companies are accelerating their pivot toward Fixed-to-the-Home (FTTH) networks, securing the high-capacity, low-latency foundation that wireless alternatives cannot match.

Regulatory Moats - OJK & KPPU

Navigating OJK and KPPU frameworks is critical, as acquiring a public target triggers mandatory tender offers and stringent antitrust thresholds.

OJK / Otoritas Jasa Keuangan

KPPU / Komisi Pengawas Persaingan Usaha

Mandatory Tender Offer (MTO): Acquiring a controlling stake in a listed target (WIFI) triggers an MTO to buy out minority shareholders, which significantly increases the deal's total capital requirement.

Thresholds & Timeline: Transactions exceeding Rp2.5T in combined assets or Rp5T in sales strictly mandate a post-merger notification within 30 working days.

Refloat Rule: The acquirer must sell back a portion of shares to the market if the MTO drops public liquidity below IDX minimum requirements.

Strategic Focus: The deal structure must actively prove that vertical integration into the fiber market does not create unfair barriers to entry.

The Related Party Transaction (RPT) Advantage: TOWR (Djarum) vs. WIFI (Hashim) carries significantly lower RPT risk compared to MTEL (Telkom)

Global precedents highlight that successful diversification requires new end-users, strict ROIC underwriting, and disciplined equity funding.

American Tower - Coresite

Detail	Data
Acquisition price	\$10.1B
CoreSite assets	25 data centers, ~288 MW capacity
Strategic rationale	Data center demand structural (cloud, AI, 5G edge)
Result (2026)	Maintained – AMT still expanding data center footprint

- **Transaction:** Diversified away from pure-play towers into the data center ecosystem.
- **Key Takeaway:** Targeted robust structural demand, maintained strict valuation discipline (avoided overpaying), and successfully integrated the asset into their broader digital infrastructure portfolio.
- **Lesson for TOWR:** Acquire adjacent infrastructure with structural demand, not just “growth story.” WIFI’s FBB = structural demand (penetrasi 21%→65%).

Crown Castle - Fiber / Small Cells

Detail	Data
Total Invested	>\$10B in fiber & small cell
Divestment (2025)	Sold fiber to EQT/Zayo for ~\$8.5B
Impairment	Significant write-downs
Why it failed	(1) Fiber economics ≠ tower economics, (2) Overpay, (3) Same anchor tenants (T-Mobile/Verizon), (4) Capex uncontrollable

- **Transaction:** Aggressively invested >US\$10B into fiber and small cell networks, but ultimately suffered a massive divestment at ~US\$8.5B, booking heavy impairments.
- **Fatal Flaws:** Misunderstood the difference between tower and fiber economics, allowed CAPEX to spiral out of control, and crucially, failed to diversify their revenue base by relying on the exact same MNO anchor tenants.
- Crown Castle built fiber from scratch in an already saturated market(US fiber penetration >80%). TOWR acquires WIFI who already has a customer base in a market that’s underpenetrated (21%). **Different playbook, different outcome.**

Global precedents highlight that successful diversification requires new end-users, strict ROIC underwriting, and disciplined equity funding.

CellNex Europe Rollup - Leverage Trap

Detail	Data
Strategy	Pan-European tower acquisition spree
Debt Level	Net debt/EBITDA >7x at peak
Result	Forced deleveraging, asset sales
Lesson	Leverage discipline matters – even for good assets

- **Transaction:** Executed a massive, debt-fueled tower roll-up strategy across Europe.
- **Key Takeaway:** Pushed the balance sheet beyond sustainable limits, forcing the company into a mandatory deleveraging phase just to protect its credit ratings.
- **Lesson for TOWR:** TOWR net debt/EBITDA ~3.7x = headroom exists. But deal structure has to protect debt rating (S&P BBB-, Fitch AAA idn).

Transferability to the Indonesian Market

While the global strategic playbook is transferable, Indonesia’s specific parameters differ significantly; the market features highly concentrated ownership, stricter OJK/MTO regulatory hurdles, and shallower capital markets.

Factor	Global (US/EU)	Indonesia	Implication for TOWR+WIFI
FBB Penetration	>80% (saturated)	21% > 65% (underpenetrated)	✔ Organic case much stronger
Market Structure	Mature, slow growth	Young population, data traffic exploding	✔ Growth runway 10+ years
Ownership	Dispersed (REITs, activists)	Concentrated (conglomerate)	✔ Can pursue long-term transformation
Regulation	Antitrust moderate	KPPU strict on horizontal merger	⚠ Vertical acquisition (WIFI) = only path
Capital Market	Deep, cheap debt	Shallower, but TOWR has IG rating	⚠ Must balance debt/equity; maintain rating
Competition	Fiber: intense (overbuilt)	Fiber: oligopolistic (IndiHome dominant)	⚠ WIFI must differentiate (FWA hybrid, rural)

TOWR Can Only Capture a Part of Their Value

Value Chain Economics in Digital Connectivity

- TOWR monetizes infrastructure
- Mobile operators & ISP's monetizes access, subscriptions, customer relationships, and additional services

TOWR does not have a scale problem.
TOWR have a growth and capture problem.

TOWR Revenue is Highly Concentrated

- PT XLSmart Telecom Sejahtera Tbk (XLSmart Axiata)
- PT Indosat Ooredoo Hutchison Tbk (Indosat)
- PT Telekomunikasi Selular (Telkomsel)
- Others

Who Fits TOWR’s Need

Candidate	Business Model Fit	Growth Profile	Strategic Fit	Financial Health	Overall Score
WIFI	★★★★	★★★★	★★★★	★★★	★★★★
FiberStar	★★★	★★	★★★	★★	★★★
LINK	★	★★	★★	★★	★★
BALI	★★	★★	★★	★★	★★
MTEL	★★	★★	★	★★★★	★★
TBIG	★★	★★	★	★★★	★★
Others	★★	★★	★	★	★★

Why WIFI Triumphs

1

Most complete capability match
Only WIFI combines customer access, last-mile rollout, and monetization in one platform.

2

Stronger than FiberStar on monetization
Only WIFI combines customer access, last-mile rollout, and monetization in one platform.

3

Transforms rather than overlaps
MTEL and TBIG add more tower exposure, but do not solve TOWR’s missing access layer.

4

Only asset large enough to matter
Smaller alternatives provide partial capabilities, but lack the scale to change TOWR’s growth profile.

WIFI is the best fit for TOWR’s need

WIFI: The Missing Piece for TOWR's Next Chapter

WIFI brings the customer access, last-mile capabilities, and digital services that TOW does not have, completing the infrastructure value chain and unlocking new growth opportunities.

What WIFI Brings to TOWR

1

Direct Customer Access

73.2%

Telecom Revenue Share

2

Proven Last-Mile Execution

+ 241.6%

Telecom revenue growth (2022-2025)

3

Total net value creation

Rp 9.3 Tn

(After integration costs)

Why Not Build or Partner? Why Acquire

Criteria	Build	Partner	Acquire
Speed to Market	5-7 Years	2-7 Years	Immediate Scale
Capital Requirement	Very High	Lower Upfront	Efficient
Execution Risk	High	Medium	Low
Control & Flexibility	Full Control	Limited Control	High Control
Value Creation Potential	Uncertain	Limited	High & Immediate

Acquisition Unlocks Transformation

1

Faster entry into high-growth customer access market

2

Immediate scale with proven execution

3

Full control to intergrate and drive synergies

4

Higher value creation compared to build or partner

In a market that is growing, but moving fast, acquisition is the most effective way for TOWR to capture the next stage of value.

Acquire WIFI

Not just an investment, but a strategic step to complete TOWR’s growth journey.

TOWR Shareholder Structure

WIFI Shareholder Structure

**This is not a fragmented public market transaction.
Both companies are anchored by concentrated ownership**

	Consideration	60% debt - 40% equity
	Post-Deal	Listed - Full Consol

Funding Mix

Debt leads because it's cheaper than equity, the 40% equity keeps leverage in check.

Total Funding
Rp9.80 tn

Deal Mechanism - OJK compliant

- Acquire 51% block**
TOWR buys a 51% controlling stake at Rp3,619/share
- MTO triggered (POJK 9/2018)**
Crossing control obliges a Mandatory Tender Offer to the ~49% public float.
- MTO Price Floor**
Offer to float = higher of acquisition price or 90-day high premium applies to ~100% of shares.
- Refloat to Keep Listing**
If acceptance pushes TOWR >80%, refloat within 2 yrs to restore >20% public float.

Why TOWR acquires.. ..activating passive tower

- Concentration** → Cut the 87% customer concentration risk
- Tower Economics** → Activate the tenancy base
- Growth** → Own the FMC Platform, monetize home-passes
- Value Chain** → From single to 5 monetisation layers

Why WIFI sells.. ..value crystallised now

- Funding** → Rp7.6 tn TOWR cashflow
- Network** → Access to 185,000 km fibre
- Rollout** → Cut up to ~30%
- Valuation** → +73% premium

The 73% premium is measured against **WIFI intrinsic value**, the premium is justified by what it buys: our value-creation bridge shows the deal still generates **net positive value**.

Standalone → Pro-forma (FY2025 basis)

Revenue (Rp bn) **+12.5%**
13,328 → **14,987**

EBITDA (Rp bn) **+10.1%**
10,924 → **12,030**

Net Debt/EBITDA **+0.12x**
4.07x → **4.19x**

Diluted Shares (bn) **+9.03**
58.20 → **67.23**

Goodwill created **PPA**
- → **Rp3.82 tn**

Run-rate EPS (Rp) **+1%**
68.27 → **68.94**

In the first 2 years TOWR absorbs acquisition costs and PPA amortisation before synergies kick in, so pro-forma EPS lags standalone by up to 13.1%. From 2028, pro-forma overtakes standalone and the gap widens every year.

Pro-forma EPS overtakes standalone in 2028 (Rp)

The deal asks shareholders to absorb **two years of modest dilution** in exchange for a higher EPS trajectory from 2028 onward. A classic value-creating acquisition profile where the crossover timeline is well within the board's typical 3-year accretion test.

Financing Strategy: Leverage Disciplined, covenant headroom intact

Net debt/EBITDA across tender-acceptance scenarios

The 40% equity proportion caps new debt: leverage rises only 4.07x → 4.19x in the base case. Full tender is the stress valve. The refloat brings it back below the standalone starting point.

Rp565 bn
Target net-cash cushion

Rp1,106 bn
Incremental EBITDA

Covenant Headroom - Interest Coverage

Pro-forma coverage - 0.94x of headroom above the covenant floor.

27.3%
EBITDA decline to breach

0.94x
Headroom vs floor

3.60x
Post-refloat coverage

- ### Credit-rating stance & actions
- 1 Interest coverage is the tightest metric and stays above the 2.50x floor in every base scenario.
 - 2 The refloat timetable is a rating commitment, full-tender interim coverage (2.89x) de-levers to 3.60x.
 - 3 Pre-brief agencies with the feleveraging schedule; retain the option to raise the equity portion if indications weaken.

Return Analysis: 34.2% IRR, +Rp18.1 tn NPV, 4.1 year payback

+Rp18.1 tn
NPV

4.1 yrs
Payback

34.2% > 8.1%
IRR WACC

Cumulative cash flow

- The Deal projecting **34.2% IRR** which is **higher than 8.1%** cost of capital (WACC) by a 26.1 pp margin.
- The deal is expected to generate **NPV of +Rp18.1 trillion**, with **4.1-year payback**.
- Cumulative cash flow chart** confirms this payback timeline, highlighting a significant cash inflow in Year 5.

Value Creation

- Value Creation Bridge:** despite paying a premium, PV of synergies (Rp5,045 billion) and the standalone stake value result in a positive net value creation of Rp344 billion, solidifying the transaction's strong economic justification.

NPV Sensitivity (Rp tn) - exit x synergy realisation

NPV	40.0%	55.0%	70.0%	85.0%	100.0%
6.0x	11,090	11,265	11,440	11,616	11,791
7.5x	15,034	15,210	15,385	15,561	15,736
8.5x	17,664	17,840	18,015	18,191	18,366
10.0x	21,609	21,785	21,960	22,135	22,311
11.0x	24,239	24,415	24,590	24,765	24,941

NPV swings with the exit multiple (6.0x→11.0x roughly doubles it) but hardly moves across synergy realisation (+Rp0.7 tn from 40%→100%). Synergies are upside, not the thesis – even at 40% capture, NPV stays above Rp11 tn.

NPV Sensitivity (Rp tn) - exit x revenue growth

NPV	0.70x	0.85x	1.00x	1.15x	1.30x
6.0x	4,713	8,019	11,326	14,633	17,939
7.5x	7,474	11,372	15,271	19,169	23,068
8.5x	9,315	13,608	17,901	22,194	26,487
10.0x	12,076	16,961	21,846	26,730	31,615
11.0x	13,917	19,197	24,476	29,755	35,034

Both axes bite; revenue growth is the real swing factor (Rp9.3→26.5 tn at 8.5x). Even the worst corner – 6.0x exit and 0.70x growth – still yields +Rp4.7 tn.

Key Takeaways

- Returns clear the hurdle decisively**
- Capital is recovered by exit** → cumulative cash flow confirm 4 year payback
- Value-accretive even after the premium** → Rp838 bn net value created
- NPV-positive in every stress cell** → no combination destroys the value

TOWR + WIFI creates multiple layers of synergy across revenue, costs and financing

Rp 494.9bn annual run rate synergies at full realization :

1

Cost Synergies

Rp 145.5bn

- Neutral-host tower tenancy creates incremental tenancy opportunities on TOWR’s existing infrastructure
- FTTH and FWA deployment benefits from access to TOWR’s tower footprint
- B2B cross-selling between infrastructure and connectivity platform
- Larger subscriber scale supports ARPU uplift, churn reduction and advertising monetization

2

Revenue Synergies

Rp 165.4bn

- TOWR + WIFI (SG&A, Co-location, Procurement)
- SG&A consolidation removes overlapping corporate functions
- Co-location reduces incremental infrastructure requirements
- Procurement and backbone integration create purchasing efficiencies

3

Financing Synergies

Rp 113.9bn

8.8%

WIFI Cost of Debt

6.9%

TOWR Cost of Debt

- WIFI current cost of debt ->TOWR lower funding cost
- Refinancing WIFI debt at TOWR’s lower funding cost generates recurring interest savings

Integration Creates Structural Downside Risks that Partially Offset the Synergy

Rp 103.0bn annual reccuring dissynergies :

D1

Loss of New Tenant Orders

Rp 44.4bn

MNO Customers become competitors to WIFI

D2

Price Concessions at Renewal

Rp 16.3bn

Competitive pressure at contract renewal

D3

Post Merger Customer Churn

Rp 42.3bn

Customer attrition during integration

Additional one time integration costs :

D4 Integration Cost Overrun

130.0bn

D5 Employee Attrition and Retention

Post Refloat (Rp10 Bn Raise)	4,01x	3.60x	2.5x

- 40% equity funding caps new debt and leverage rises only from 4.07x to 4.19x
- 0.94x coverage headroom, EBITDA must fall 27.3% to breach the 2.5x floor
- Refloat (Rp10 tn) de-levers back to 4.01x / 3.60x coverage
- Rp1,106 bn incremental EBITDA + run-rate synergies absorb the added debt
- Pre-brief rating agencies; option to raise the equity portion if rating signals weaken

2. Financing Risk (High)

SOURCES & USES (Rp Bn)

Category	Value (Rp Bn)
51% WIFI Block Purchase	9,799
Mandatory Tender Offer (Max)	9,415
Integration Cost (Yr 1 & 2)	520
Other Transaction Costs	310
Total	20,045

Total Uses
Rp20,0 Trillion

- Secure a committed/underwritten acquisition facility before launch – tender funding ring-fenced in Sources & Uses
- 60/40 debt-equity keeps base ND/EBITDA at 4.19x (investment-grade profile)
- Refloat schedule ($\geq 20\%$ float within 2 yrs) is a de-leveraging path independent of markets
- Staggered drawdown; flexibility to raise the equity portion if debt markets tighten

3. Overpayment/Valuation RISK (High)

WIFI trades at a premium to TOWR. Overpaying would compress returns and reduce downside buffer.

EV/EBITDA Multiple (FY2025)

WIFI SOTP (PV)
Rp3,424
/share

Offer Price
Rp3,619
/share

Within
Fair Value
Range

Risk Mitigation

Anchor the Rp3,619 offer to intrinsic value, validate it through KJPP, and rely on Rp4.1T synergy NPV + Rp1.1T FWA upside with positive downside sensitivities.

4 FWA Execution Risk (High)

IRA (FWA) expansion is capital-intensive and execution-heavy. Under-delivery vs plan directly impacts growth and returns.

Key Risk & Mitigation

Slower-than-planned Rollout

Phased rollout tied to verified demand, supported by 1.0 mn IRA pre-registrations

Lower take up/ARPU

Stress-tested NPV remains positive even at a 0.70x revenue-growth scenario

Intense Competition

Retain WIFI's execution team via lock-up to preserve local market knowledge

High Capex Intensity

Use TOWR's lower-cost funding + tower co-location to reduce per-site build costs

5. Intergration Risk (High)

Different operating models (B2B infra vs consumer retail) create execution risk and culture friction.

Integration Complexity		Mitigation	
1	Different operating models (828 vs B2C)	▶	36-month phased integration
2	Customer acquisition, billing, field service	▶	Keep WIFI as a distinct business unit (Phase 1)
3	Retail churn management	▶	Retain key WIFI management via equity / lock-up
4	Network rollout & operations	▶	Integrate shared functions first, customer operations later

Expected Outcome

Protect execution speed while unlocking synergy overtime

6. Regulation Risk (Medium)

KPPU/Competition Risk

Change of control triggers mandatory notification within 30 working days.

Risk Mitigation:

- Pro-merger consultation
- Market overlap analysis
- Regulatory CP
- Prepare remedies early

OJK/Mandatory Tender Offer Risk

51% acquisition triggers MTO for remaining public shares.

Risk Mitigation:

- Ring-fence tender funding
- Include in Sources & Uses
- Maintain listing status
- Restore public float

Risk Legend

- | | | |
|---|----------------------------------|--------|
| 1 | Leverage & Covenant Risk | High |
| 2 | Financing Risk | High |
| 3 | Overpayment/Valuation risk | High |
| 4 | Integration Risk | High |
| 5 | FWA Execution Risk | Medium |
| 6 | KPPU/Competition Risk | Medium |
| 7 | OJK/ Mandatory Tender Offer Risk | Low |

Conclusion: a fair-value, value-creating entry into convergence – PROCEED

PROCEED

Acquire a 51% controlling stake in WIFI at Rp3,619/share

TOWR’s platform for fixed-mobile convergence

IRR

33.9%

NPV

+Rp17.9 tn

Synergy NPV

Rp4.1 tn

Payback

4.1 yrs

Bear Case IRR

16.6%

WHY IT FITS

Strategic logic

Activates 36,247 towers & ~185,000 km fibre into an FMC platform; cuts customer concentration 87% → ~78%.

WHY THE PRICE

Fair value, not overpayment

Rp3,619 sits at blended intrinsic value (DCF Rp3,666 / SOTP Rp3,424); a real premium to a Rp2,090 market, fair value to TOWR.

WHY IT PAYS

Returns clear the hurdle

34% IRR vs 8.1% WACC (+26 pp), +Rp838 bn net value after the premium; NPV-positive in every stress cell.

WHY IT’S SAFE

Bounded downside

Leverage 4.07x → 4.19x, 0.94x covenant headroom; bear case still +Rp4.5 tn NPV at 16.6% IRR.

Recommended Next Steps

1. **Approve & fund** → Board approval at Rp3,619; secure committed 60/40 debt-equity facility.
2. **Execute OJK MTO** → Launch the mandatory tender offer; refloat to keep ≥20% public float within 2 years.
3. **Protect the rating** → Pre-brief agencies with the deleveraging schedule; KJPP fairness opinion + RUPS.
4. **Integrate** → Stand up a 100-day office (Rp520 bn); retain WIFI management, capture synergies on a phased plan.

STATEMENT OF ORIGINALITY
Finance for Indonesia Case Competition 2026

The undersigned, acting as the Team Leader of a participating team in the Finance for Indonesia Competition 2026:

Full Name : Darell Matt Tanujaya

Team Name : Odyssey Capital

Email : darellmatttanujaya@gmail.com

Phone Number : 081519317017

Together with the following team members:

Name of Member 1 : Mishell Lorence

Name of Member 2 : Gloria Christophera Kusuma

Hereby declare in good faith that the work submitted to the Finance for Indonesia Case Competition 2026, consisting of the pitch deck (PowerPoint) and the supporting financial model (Excel):

1. Is the original work of the team members listed above, prepared independently without involvement from any external party;
2. Is free from any form of plagiarism, in whole or in part, all cited data, references, and sources have been properly attributed in accordance with applicable citation standards;
3. Has never been, and is not currently being, submitted to any other similar competition, whether at the national or international level;
4. Has not been previously published in any medium and does not infringe upon the intellectual property rights of any third party.

Should any indication or evidence of violation of this statement be found at any time, including plagiarism, data manipulation, external assistance, or multi-competition submission, our team is willing to accept the sanctions imposed by the committee, including but not limited to disqualification from the Finance for Indonesia Case Competition 2026, forfeiture of all prizes and certificates, and other consequences in accordance with the applicable competition rules.

This statement is made truthfully, without coercion from any party, and may be legally accounted for.

Jakarta, 18,September, 2026
Team Leader,

Darell Matt Tanujaya

Rp bn unless stated.						
Valuation year (1=FY26F, 2=FY27F, ... 5=FY30F):		2		FY2027F		
A. SEGMENT ENTERPRISE VALUE						
Segment	Revenue	EBITDA %	EBITDA	EV/EBITDA	Enterprise Value	% of EV
Telecommunication (FTTH + FWA + wholesale)	5,275	63.3%	3,340	7.0x	23,380	92.8%
Advertising	747	40.2%	301	6.0x	1,803	7.2%
Total enterprise value	6,022		3,641		25,184	100.0%
B. EQUITY VALUE BRIDGE						
Enterprise value (sum of parts)					25,184	
less: Net debt (FY2027F)					(989)	
Equity value (100% of subsidiaries)					24,194	
less: Minority interest (book, model FY)					(2,071)	
Equity value to WIFI shareholders					22,123	
Shares outstanding (mn)					5,309	
SOTP value per share – FY2027F (Rp)					4,167	
Discount to present value						
Cost of equity		15.1%				
Years to discount		1.4				
SOTP target price – present value (Rp)					3,424	
Current price (Rp)					2,090	
Upside / (downside)					63.8%	
C. CROSS-CHECKS						
Sum of segment EBITDA (SOTP)					3,641	
Group EBITDA FY2027F (model)					3,641	
SOTP vs model EBITDA					0.0%	
Implied whole-co EV/EBITDA					6.9x	

D. BASIS FOR MULTIPLES – fibre/broadband peers			
Peer	EV/EBITDA		
Link Net (retail fibre)	4.9x		
Converge ICT (retail fibre)	3.8x		
NetLink NBN (wholesale)	16.4x		
TIME dotCom	12.7x		
Remala Abadi (DATA)	12.9x		
Fibre peers – Quartile 1	8.8x		
Fibre peers – Median	12.9x		
Fibre peers – Quartile 3	22.5x		
FWA reference: MNO peers ~6x (report Exhibit 16); FTTH used 8x, FWA 7x.			
Segment EBITDA margins are analyst ESTIMATES - WIFI does not disclose segment-level EBITDA.			
Sum-of-segment EBITDA is reconciled to group EBITDA in section C (currently within a few %).			
F. ACTUAL SEGMENT EBITDA MARGINS (from 'source WIFI revenue', FY2025)			
Segment (source)	Revenue	EBITDA	Margin
Telecommunication (fibre/FTTH)	1,214	934	76.9%
Advertising (media)	445	218	48.9%
EBITDA = Operating Income + Depreciation, from segment disclosures. FWA not yet separate (launched 2026).

OJK Regulatory Checklist — Acquisition of a Listed Company

TOWR acquiring 51% of WIFI (Tbk) → change of control. Verified against OJK regulations (see sources).

Regulation / trigger	What it requires	Impact on this deal
POJK 9/POJK.04/2018 — Pengambilalihan (Takeover)	Buying >50% voting shares OR gaining control = becoming 'Pengendali' (Art 1(4)). Acquiring 51% triggers a MANDATORY TENDER OFFER (Penawaran Tender Wajib) to all remaining public shareholders.	TRIGGERED. TOWR must launch an MTO for the ~49% public float.
MTO price floor (POJK 9/2018, Art 17)	For listed & liquid shares, MTO price ≥ the HIGHER of: (a) the acquisition price paid for control, or (b) the average of the highest daily prices over the 90 days before announcement.	Offer @35% = Rp2.822 > 90-day high (~Rp2.530), so the acquisition price sets the floor. TOWR must pay Rp2.822 to ALL tendering public holders — a higher premium raises total cash sharply.
MTO timeline (POJK 9/2018, Art 7/14/16)	Announce in a newspaper + file with OJK (Art 7); 30-day offer period (Art 14); settle within 12 days; report results to OJK within 5 days (Art 16).	Plan announcement + 30-day tender window into the deal timetable.
Refloat requirement (POJK 9/2018, Art 21)	If after the MTO the controller holds >80% of capital, it must divest so the public again holds ≥20%, within a maximum of 2 years.	If take-up is high, TOWR may need to sell down to keep ≥20% public float within 2 years.
POJK 17/POJK.04/2020 — Transaksi Material	Transaction value ≥20% of equity → public disclosure + independent appraiser (KJPP) report. >50% → also independent-shareholder RUPS approval.	The WIFI stake is material for TOWR → disclosure + KJPP fairness opinion required (RUPS if it crosses 50% of TOWR equity).
POJK 42/POJK.04/2020 — Transaksi Afiliasi / Benturan Kepentingan	If buyer & target are affiliated or a conflict of interest exists: independent appraiser fairness opinion + disclosure + independent-shareholder approval. Exempt if <0.5% of paid-up capital or <Rp5bn.	Check TOWR–WIFI affiliation (common controllers). If affiliated → independent RUPS + KJPP fairness opinion needed.
Independent appraiser (KJPP)	A registered valuer must issue a valuation & fairness opinion supporting the offer price for MTO / material / affiliated transactions.	This football field + valuation supports the fairness opinion; a licensed KJPP must formally sign off.

M&A Financing Mix

Financing Mix (Aligned to Merger-Model & Sensitivities)

Model-Linked Financing Assumptions		
Purchase premium	1	Linked to Control and used in Merger-Model purchase price
% cash funding	0.0%	Must match Sensitivities C11
% debt funding	60.0%	Must match Sensitivities C12
% stock funding	40.0%	Must match Sensitivities C13
Foregone cash rate	2.0%	Used in Sensitivities as financing drag on cash portion
Debt interest rate	7.0%	Used in Sensitivities as financing drag on debt portion
Buyer tax rate	17.3%	Applied to combined pre-tax earnings in sensitivities
Buyer share price (IDR)	434	Used to translate stock consideration into new shares

Buyer Standalone Position (FY2025)		
Buyer cash (IDR mm)	709,858.0	Cash & short-term securities
Buyer gross debt (IDR mm)	45,219,438.0	ST + LT debt
Buyer EBITDA (IDR mm)	10,924,099.0	EBIT + D&A proxy
Buyer shares (000)	58,202,694	Diluted share count
Buyer pre-deal EPS (IDR/share)	68.3	Base EPS used for accretion/dilution

Sources & Uses (Directly Aligned to Merger-Model)		
Seller offer price / share (IDR)	3,619.4	Purchase price incl. premium
Equity purchase price (IDR mm)	9,798,913.4	Used in Merger-Model rows 7-10
Cash used (IDR mm)	-	Cash-funded portion
Debt issued (IDR mm)	5,879,348.0	Debt-funded portion
New shares issued (000)	9,031,257	Stock-funded portion translated into shares
Stock consideration value (IDR mm)	3,919,565.4	Implied value of stock consideration

Financing Drag (Mirror of Sensitivities Formula Logic)		
Foregone cash cost (pre-tax, IDR mm)	-	Cash used × foregone cash rate
Debt interest cost (pre-tax, IDR mm)	411,554.4	Debt issued × debt rate
Total financing drag (pre-tax, IDR mm)	411,554.4	Directly mirrors cash and debt deductions in Sensitivities
Estimated after-tax financing drag (IDR mm)	340,315.4	Shown for analytical reference

Pro Forma Capitalization & Balance Sheet Effects		
Remaining buyer cash after deal (IDR mm)	709,858.0	Post-deal cash balance
Pro forma gross debt (IDR mm)	51,098,786.0	Buyer debt + new debt issued
Pro forma net cash / (debt) (IDR mm)	(50,388,928.0)	Positive = net cash, negative = net debt
Pro forma gross debt / EBITDA	4.7x	Headline leverage after transaction
Pro forma share count (000)	67,233,951	Buyer shares + new shares issued

Interpretation		
Funding structure		
Cash coverage vs equity purchase price		0.1x
Implied stock issuance as % of buyer shares		15.5%
Estimated financing drag / buyer EBITDA		3.8%
Pro forma gross debt / EBITDA		-50388928.0x

Metric	Value
Buyer cash	709,858.0
Cash used	0.0
Remaining cash	709,858.0

M&A Financing Strategy

TOWR + WIFI | Financing Strategy (Section 4)

All figures Rp bn. Linked to Control / Merger-Model. 51% acquisition, 60% debt / 40% equity funding.

Key assumptions	
Run-rate synergy (full, Rp bn)	400.0
Min. interest-coverage covenant (x)	2.50x
Bridge/acquisition debt rate	7%
Refloat proceeds (Rp bn)	10,000.0

A. LEVERAGE PROFILE ACROSS TENDER-ACCEPTANCE SCENARIOS					
	Standalone	Pro-forma 0% tender	Pro-forma 50% tender	Pro-forma 100% tender	Post-refloat
Net debt	44,509.6	50,388.9	55,096.2	59,803.6	49,803.6
EBITDA (+synergies post-refloat)	10,924.1	12,030.3	12,030.3	12,030.3	12,430.3
Net debt / EBITDA	4.07x	4.19x	4.58x	4.97x	4.01x
Interest expense	3,086.5	3,498.1	3,827.6	4,157.1	3,457.1
Interest coverage (EBITDA / interest)	3.54x	3.44x	3.14x	2.89x	3.60x
Debt / equity	167%	165%	165%	165%	165%
Debt / total assets	59%	53%	53%	53%	53%

B. COVENANT HEADROOM	
Binding covenant: interest coverage (tightest in infra credit agreements)	
Pro-forma interest coverage (0% tender)	3.44x
Covenant floor	2.50x
Headroom vs covenant (x)	0.94x
EBITDA decline to breach covenant	27%
Full-tender interim coverage (pre-refloat)	2.89x
Post-refloat coverage	3.60x

C. CREDIT-RATING IMPLICATIONS	
• Leverage rises only modestly (4.07x -> 4.23x) as the 40% equity portion limits new debt.	
• Interest coverage is the tightest metric; kept above the covenant floor under the base case.	
• Full-tender acceptance pushes interim leverage to ~5.07x -> refloat timetable is a rating commitment.	
• Rating-preservation actions: pre-brief agencies, publish refloat & deleveraging schedule, retain option to raise the equity portion if rating indications weaken.	
• Target's net-cash position (Rp565bn) and Rp1,106bn incremental EBITDA cushion the added debt.	

Return Analysis

TOWR + WIFI | Return Analysis (Section 5)

Rp bn. Acquirer cash flow = 51% of target FCF + after-tax synergies - integration. Discounted at WACC.

Assumptions	
WACC (acquirer)	8.1%
Stake acquired	51.0%

Tambahan tenant TOWR 2025 (unit)	2,505	SMN AR2025: +2.505 tenant (total 60.540)
Pendapatan per tenant (Rp bn/th)	0.1442	Rp8.730 bn sewa menara ÷ 60.540 tenant
Margin EBITDA TOWR	82.0%	TOWR-3-Statements (EBITDA ÷ revenue)
Pendapatan sewa menara (Rp bn)	8,730	SMN AR2025: Rp8,73 trn = 65,47% dari total
Tenor kontrak rata-rata (tahun)	11	SMN AR2025 Catatan 39: sewa 10–13 tahun
Pendapatan WIFI (Rp bn)	1,659	Surge AR2025 FY25A
Gross margin telco WIFI	72.9%	WIFI Rev-COGS Detail
Anggaran biaya integrasi (Rp bn)	520	Link Returns Analysis
SG&A kas WIFI (Rp bn)	176.7	Cost Synergy Bottom-Up (ex-iklan & D&A)

Konsentrasi pelanggan TOWR FY25: XLSmart 42% · Indosat 34% · Telkomsel 11% = 87% pendapatan dari 3 operator yang akan bersaing dengan WIFI.

Shared Assumptions

WACC	8.1%
Tax rate	17.3%
(faktor kapitalisasi — tidak lagi dipakai, dissinergi kini lewat schedule	10.0x
SKENARIO (1=Low · 2=Base · 3=High)	2

Dissynergy Items (Rp bn)

Item	Basis	Low	Base	High	AKTIF Sumber / benchmark
D1 Kehilangan pangsa order tenant BARU	361.2	10.0%	15.0%	20.0%	44.4 87% pendapatan dari 3 MNO yang jadi pesaing WIFI; alternatif ada (MTEL 39.593, TBIG 23.892 site)
D2 Konsesi harga saat perpanjangan	793.6	2.0%	2.5%	3.0%	16.3 Kontrak 10–13 thn → ±1/11 basis jatuh tempo per tahun; preseden ISAT-Hutch 2022
D3 Churn pelanggan pasca-merger	1,659.0	2.0%	3.5%	5.0%	42.3 McKinsey: perusahaan merger rata-rata kehilangan 2–5% pelanggan gabungan ← TRANSISI: hanya tahun 1–3, TANPA terminal value (churn pasca-merger bersifat seme
D4 Pembengkakan biaya integrasi (sekali)	520.0	20.0%	25.0%	30.0%	130.0 59% deal mengalami cost overrun (PMI research)
D5 Atrisi & retensi karyawan kunci (sekali)	176.7	20.0%	25.0%	30.0%	44.2 Turnover pasca-akuisisi 47% di tahun-1 vs baseline 13%
of which PERMANENT (D1+D2) — structural, carries terminal value					60.7 D1/D2 = konflik neutral-host: berlangsung selama TOWR memiliki WIFI
Subtotal recurring / tahun (D1–D3)					103.0

FEEDS — ke mana dissinergi ini mengalir

D1–D3 recurring → Synergy_Schedule r29 · Returns Analysis r22 · Merger-Model r73 (yr1–3 penuh, yr4+ hanya D1–D	103.0
D4–D5 one-time → Returns Analysis value bridge (baris 44)	174.2

Hasil akhir (net value creation all-in) ada di Returns Analysis B43 →	838.4
---	-------

Dissynergi kini menyatu di model inti: NPV, IRR, EPS accretion, Football Field, dan M&A_Valuation semua sudah memperhitungkannya.
Perlakuan D3: churn pasca-merger adalah efek TRANSISI (benchmark McKinsey 2–5% terjadi saat integrasi), sehingga tidak diberi terminal value. D1/D2 struktural → perpetuitas.

Target Comparison

KODE	SEGMENT	MARKET CAP (~)	% DR TOWR	VERDIKT
DCII	Data center (terbesar ASEAN)	Rp456 T	~2.100%	● Mustahil — 21× TOWR, PE ~408
MORA	Backbone fiber	Rp317 T*	~1.470%	● Valuasi terdistorsi low-float
IBST	Menara + fiber	Rp11,5 T	~53%	● Afiliasi Grup Djarum (RPT); mayoritas menara
WIFI	FTTH ritel nasional + backbone rel	Rp11,3 T	~52%	● Live — skala + data lengkap, tapi mahal/besar → butuh struktur
EDGE	Data center + cloud	Rp9,7 T	~45%	● Sedang go-private (Digital Edge, TO Rp11.500)
BALI	Menara + FTTH/FTTB (untung)	Rp4,9 T	~23%	● Live — buy-and-build, profitable, kecil/regional
LINK	Broadband + cable TV	Rp4,0 T	~18%	● Rugi -Rp1,45 T, dikuasai Axiata 66%, diincar WIFI
DATA	Broadband ISP	Rp2,9 T	~13%	● Sudah dikuasai TOWR (51%)
CENT	Menara + DAS + fiber + internet	Rp2,25 T	~10%	● Live — turnaround, murah tapi rugi -Rp1,69 T
IRSX	Software/digital	Rp1,5 T	~7%	● Salah sektor (software)
GHON	Menara	Rp877 M	~4%	● Anak usaha TBIG; murni menara
MSKY	Pay-TV satelit	Rp688 M	~3%	● Bukan fiber, menyusut
SUPR	Menara	(delisting)	—	● Grup Djarum, go-private ke Protelindo
KBLV	Broadband + pay-TV	Rp146 M	~0,7%	● Pendapatan kolaps -92%, cangkang
JAST	ISP mikro	Rp90 M	~0,4%	● Terlalu kecil

Suitable with Key Question and Casebook Problem

Not Suitable with Key Questions Requirement

Dimension	MTEL (Mitratel)	TBIG (Tower Bersama)	TOWR (Sarana Menara) 
 Market cap (2026)	~Rp35.4 T	~Rp30.5 T	~Rp21.6 T
 Towers	~39,593	23,892	~36,049
 Revenue 2025	~Rp9.5 T	~Rp6.9 T	~Rp13.3 T
 EBITDA 2025	~Rp7.8 T	~Rp5.9 T	~Rp10.9 T
 Net debt / EBITDA	~2.7x (strongest)	~5.0x (weakest)	~4.1x (manageable)
 Parent / control	Telkom (SOE)	Fully independent	Djarum Group
 Fiber / digital base	Moderate	Small (iForte)	Large — 253k km + DATA (51%)
 Case positioning	Most defensive	Most exposed	Most aggressive
 M&A track record	Limited	Limited	Proven (DATA, IBST, SUPR)
Verdict	Strong balance sheet, but captive to Telkomsel + SOE/RPT constraints — least independent freedom to reinvent	Most pressured to act, but weakest balance sheet — “most needs to, least able”	Motivated + capable + already on the path 

WHY TOWR IS THE CLIENT

- 

1 **THE TRANSFORMATION THESIS IS ALREADY ITS REAL STRATEGY.**

TOWR is the only one actively becoming a digital-infrastructure group (253k km fiber, 51% of DATA/Remala) — acquiring WIFI extends a path it has already committed to, not a leap into the unknown.
 - 

2 **STRONGEST ASSET COMPLEMENTARITY.**

Its national FTTT backbone is the "pipe" that WIFI's last-mile retail demand can fill — a genuine vertical-integration synergy neither MTEL nor TBIG can match.
 - 

3 **PROVEN INORGANIC CAPABILITY.**

TOWR has repeatedly executed acquisitions (DATA 40%→51%, IBST, SUPR go-private) — de-risking integration execution.
 - 

4 **INDEPENDENCE WITHOUT OVER-LEVERAGE.**

Unlike MTEL (captive to Telkomsel, SOE/related-party baggage), TOWR is free to reinvent itself; unlike TBIG (~5.0x leverage, tenant losses), its ~4.1x leverage still leaves capacity to fund a deal.
 - 

5 **HIGHEST STRATEGIC OPTIONALITY AND MOTIVATION**

to capture value across the whole chain — exactly what the case rewards.

In one line: MTEL has the firepower but not the freedom; TBIG has the urgency but not the balance sheet; **TOWR has both the motivation and the means** — and is already executing the thesis.
