APPENDIX

APPENDIX 1: Risk Mitigation

RISK MITIGATION

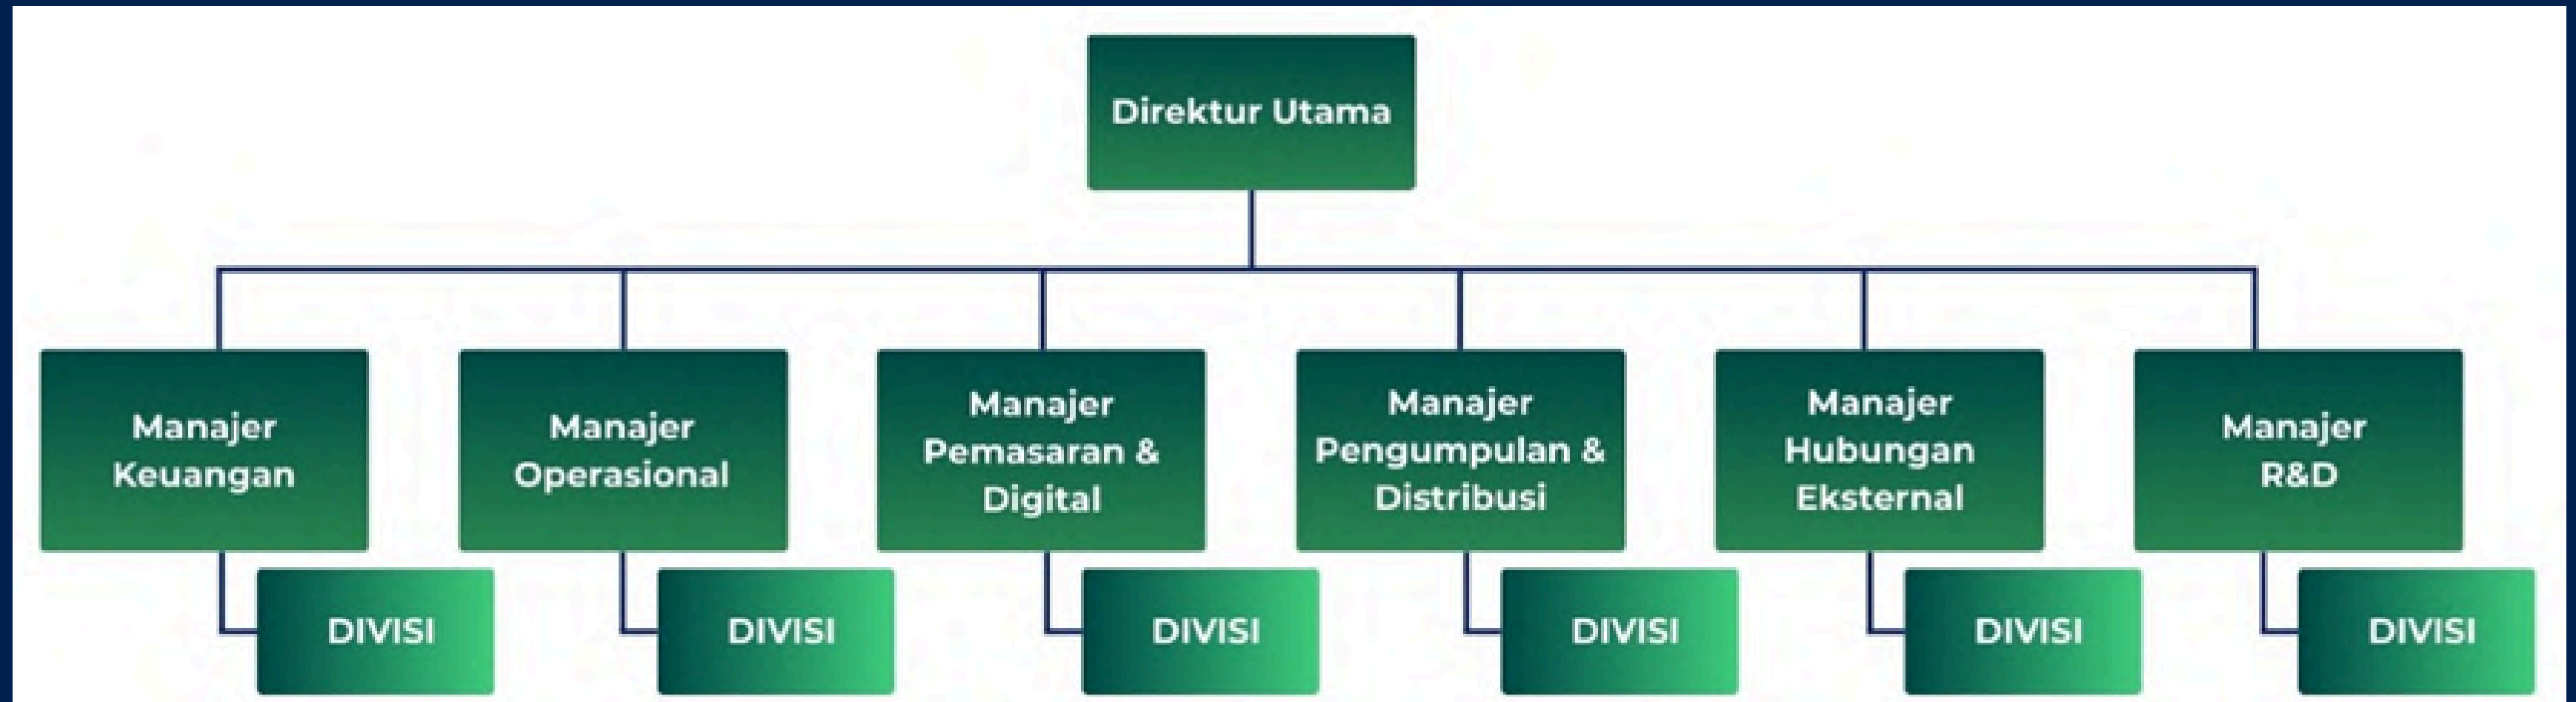

Possible Risk	Mitigation
1. Armada logistik tidak mampu memenuhi permintaan pickup/drop-off	Optimasi rute logistik berbasis AI & penambahan mitra pihak ketiga untuk transportasi
2. Minat masyarakat rendah untuk menyeter minyak jelantah	Edukasi publik, insentif saldo digital, dan kampanye "eco-lifestyle" melalui komunitas & sekolah
3. Regulasi biodiesel berubah (kuota ekspor, standar SNI, pajak energi)	Bekerja sama dengan asosiasi energi terbarukan & konsultasi hukum untuk memastikan compliance

Risiko	Penyebab	Dampak	Strategi/Mitigasi
Kualitas minyak jelantah tidak konsisten	Penyedia minyak tidak menyaring minyak, banyak kontaminan (air, sisa makanan)	Penurunan kualitas biodiesel & produk turunan, biaya tambahan filtrasi	Edukasi penyetor, penggunaan alat penyaring portable berbasis IoT, standarisasi kualitas input
Partisipasi masyarakat rendah	Rendahnya kesadaran akan manfaat daur ulang minyak jelantah, kurang insentif	Volume UCO terkumpul sedikit, target supply chain terganggu	Kampanye sosial, insentif saldo digital & voucher, kerja sama dengan sekolah, kampus, UMKM
Masalah logistik & pengiriman	Armada terbatas, kemacetan, penjadwalan tidak efisien	Pickup terlambat, biaya operasional tinggi, reputasi buruk	Optimasi rute, kolaborasi dengan logistik pihak ketiga, buffer schedule untuk pickup/drop-off
Risiko regulasi & kepatuhan	Perubahan aturan B35, standar biodiesel, atau ekspor	Denda/sanksi, pembatasan ekspor, biaya kepatuhan meningkat	Hubungan aktif dengan Kementerian ESDM, asosiasi energi, audit regulasi rutin, tim legal internal
Resistensi konsumen terhadap produk limbah	Persepsi negatif bahwa produk dari jelantah tidak higienis	Rendahnya penjualan biodiesel/sabun/lilin, citra buruk	Branding eco-friendly, sertifikasi SNI, kampanye kualitas & keamanan, endorsement komunitas hijau
Ketidakakuratan sistem aplikasi (AI profiling, tracking)	Bug pada aplikasi, data lokasi tidak akurat	Penurunan pengalaman pengguna, pickup gagal, trust berkurang	QA rutin, update aplikasi berkala, integrasi GPS & notifikasi real-time

APPENDIX 2: SCQ Analysis

Situation	Complication	Question
Hampir 3 juta ton minyak goreng dikonsumsi masyarakat Indonesia dengan konversi sebesar 10% menjadi minyak jelantah dan sebanyak 80% dari minyak jelantah tersebut dibuang sembarangan .	Kurangnya pemahaman yang merata di masyarakat atas dampak buruk pembuangan limbah minyak goreng ke lingkungan.	Bagaimana cara menurunkan 20% dari minyak jelantah yang dibuang sembarangan di daerah padat penduduk selama 12 bulan pertama yang terus berekspansi dengan solusi pengumpulan praktis bagi masyarakat serta meningkatkan <i>brand awareness</i> terhadap pentingnya produk ramah lingkungan?
Kebutuhan pasar yang semakin meningkat atas produk hijau dan energi terbarukan yang berbahan dasar minyak jelantah sebagai solusi atas BBM berbahan dasar energi tidak terbarukan yang semakin terbatas dan upaya penurunan jumlah karbon global.	Kurangnya brand awareness pada produk ataupun jasa ecofriendly di masyarakat.	Bagaimana mendukung <i>green industry</i> untuk menghasilkan green product dan energi terbarukan dengan mengumpulkan minyak jelantah di masyarakat guna mendukung SDG 7 dan SDG 8 (sustainability).
	Kurangnya industri pengelola green product berbahan dasar minyak jelantah di Indonesia.	

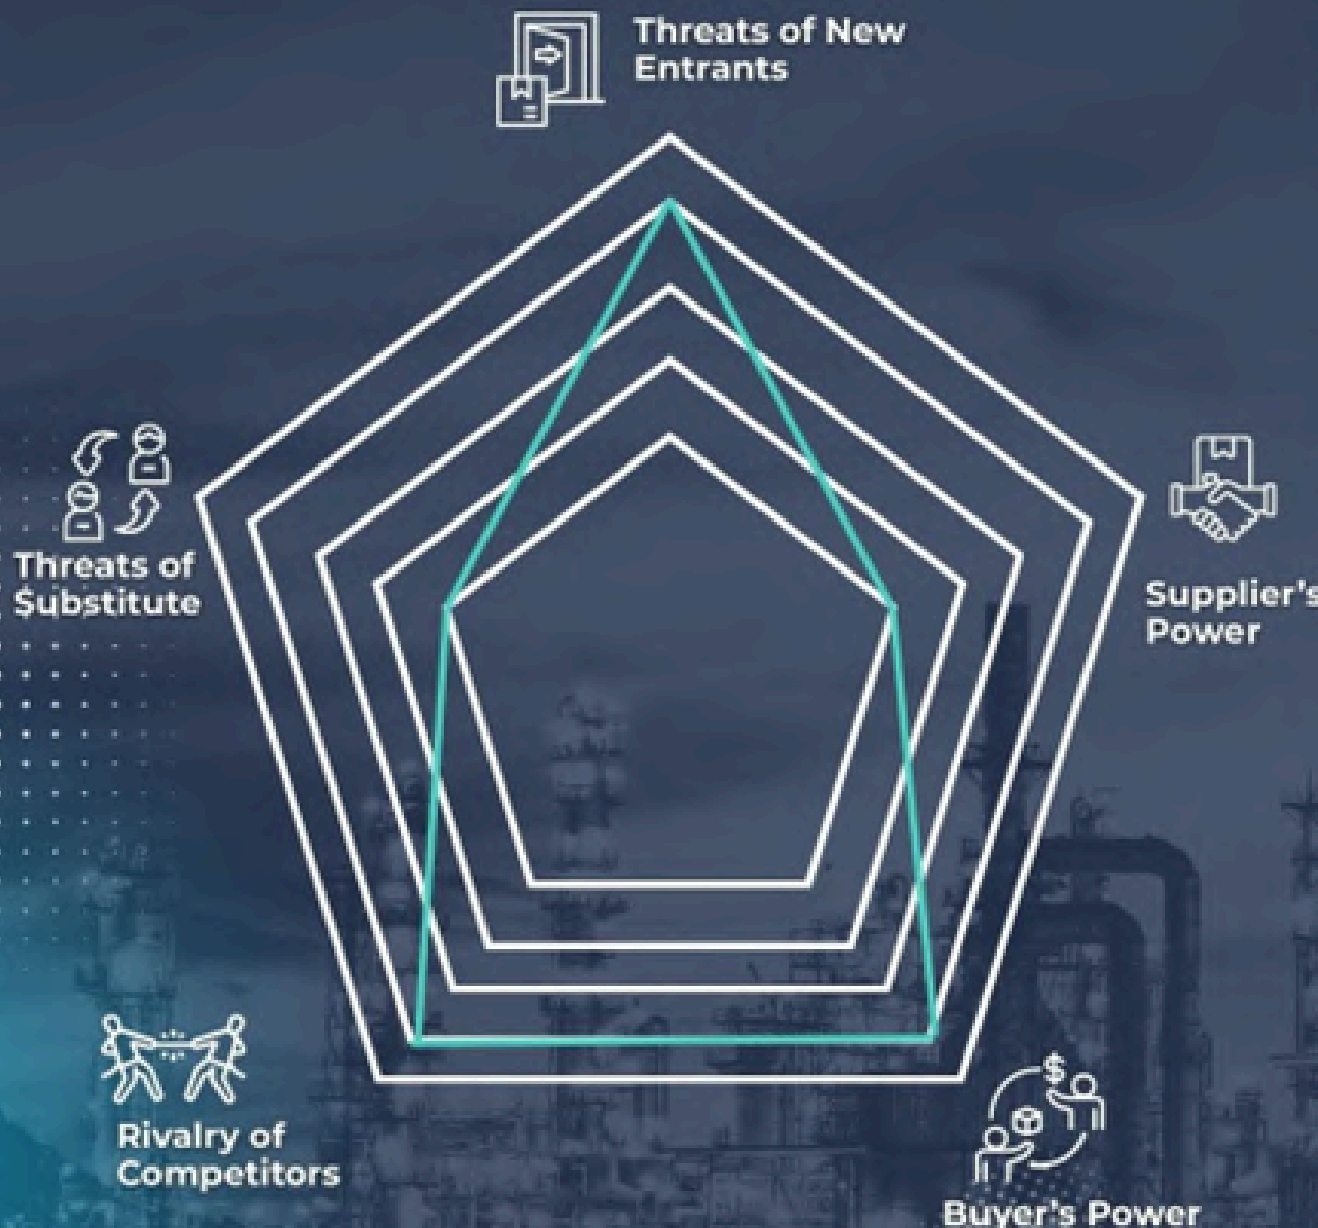

APPENDIX 3: Struktur Manajemen

APPENDIX 4: Five Porter Analysis

YUco

Five Porter Forces Analysis

Threat of New Entrants

Moderately High

- Kebijakan pro-energi terbarukan dan biodiesel menciptakan pasar yang terjamin dan insentif
- Aturan terkait pengelolaan limbah UCO atau limbah B3 memengaruhi operasional dan biaya.
- Subsidi atau keringanan pajak bisnis energi terbarukan meningkatkan profitabilitas

Supplier's Power

Low

- Perkembangan teknologi mempengaruhi adopsi penggunaan platform online
- Kemajuan logistik dengan munculnya sistem pickup memudahkan penyeteroran UCO dan efektivitas.
- Pengembangan teknologi konversi UCO ke biodiesel yang lebih efisien mengurangi biaya produksi.

Buyer's Power

Moderately High

- Kesadaran akan sustainability semakin berkembang di lingkungan masyarakat
- Tren konsumsi yang lebih bertanggung jawab dan minat pada produk ramah lingkungan

Rivalry of Competitors

Moderately High

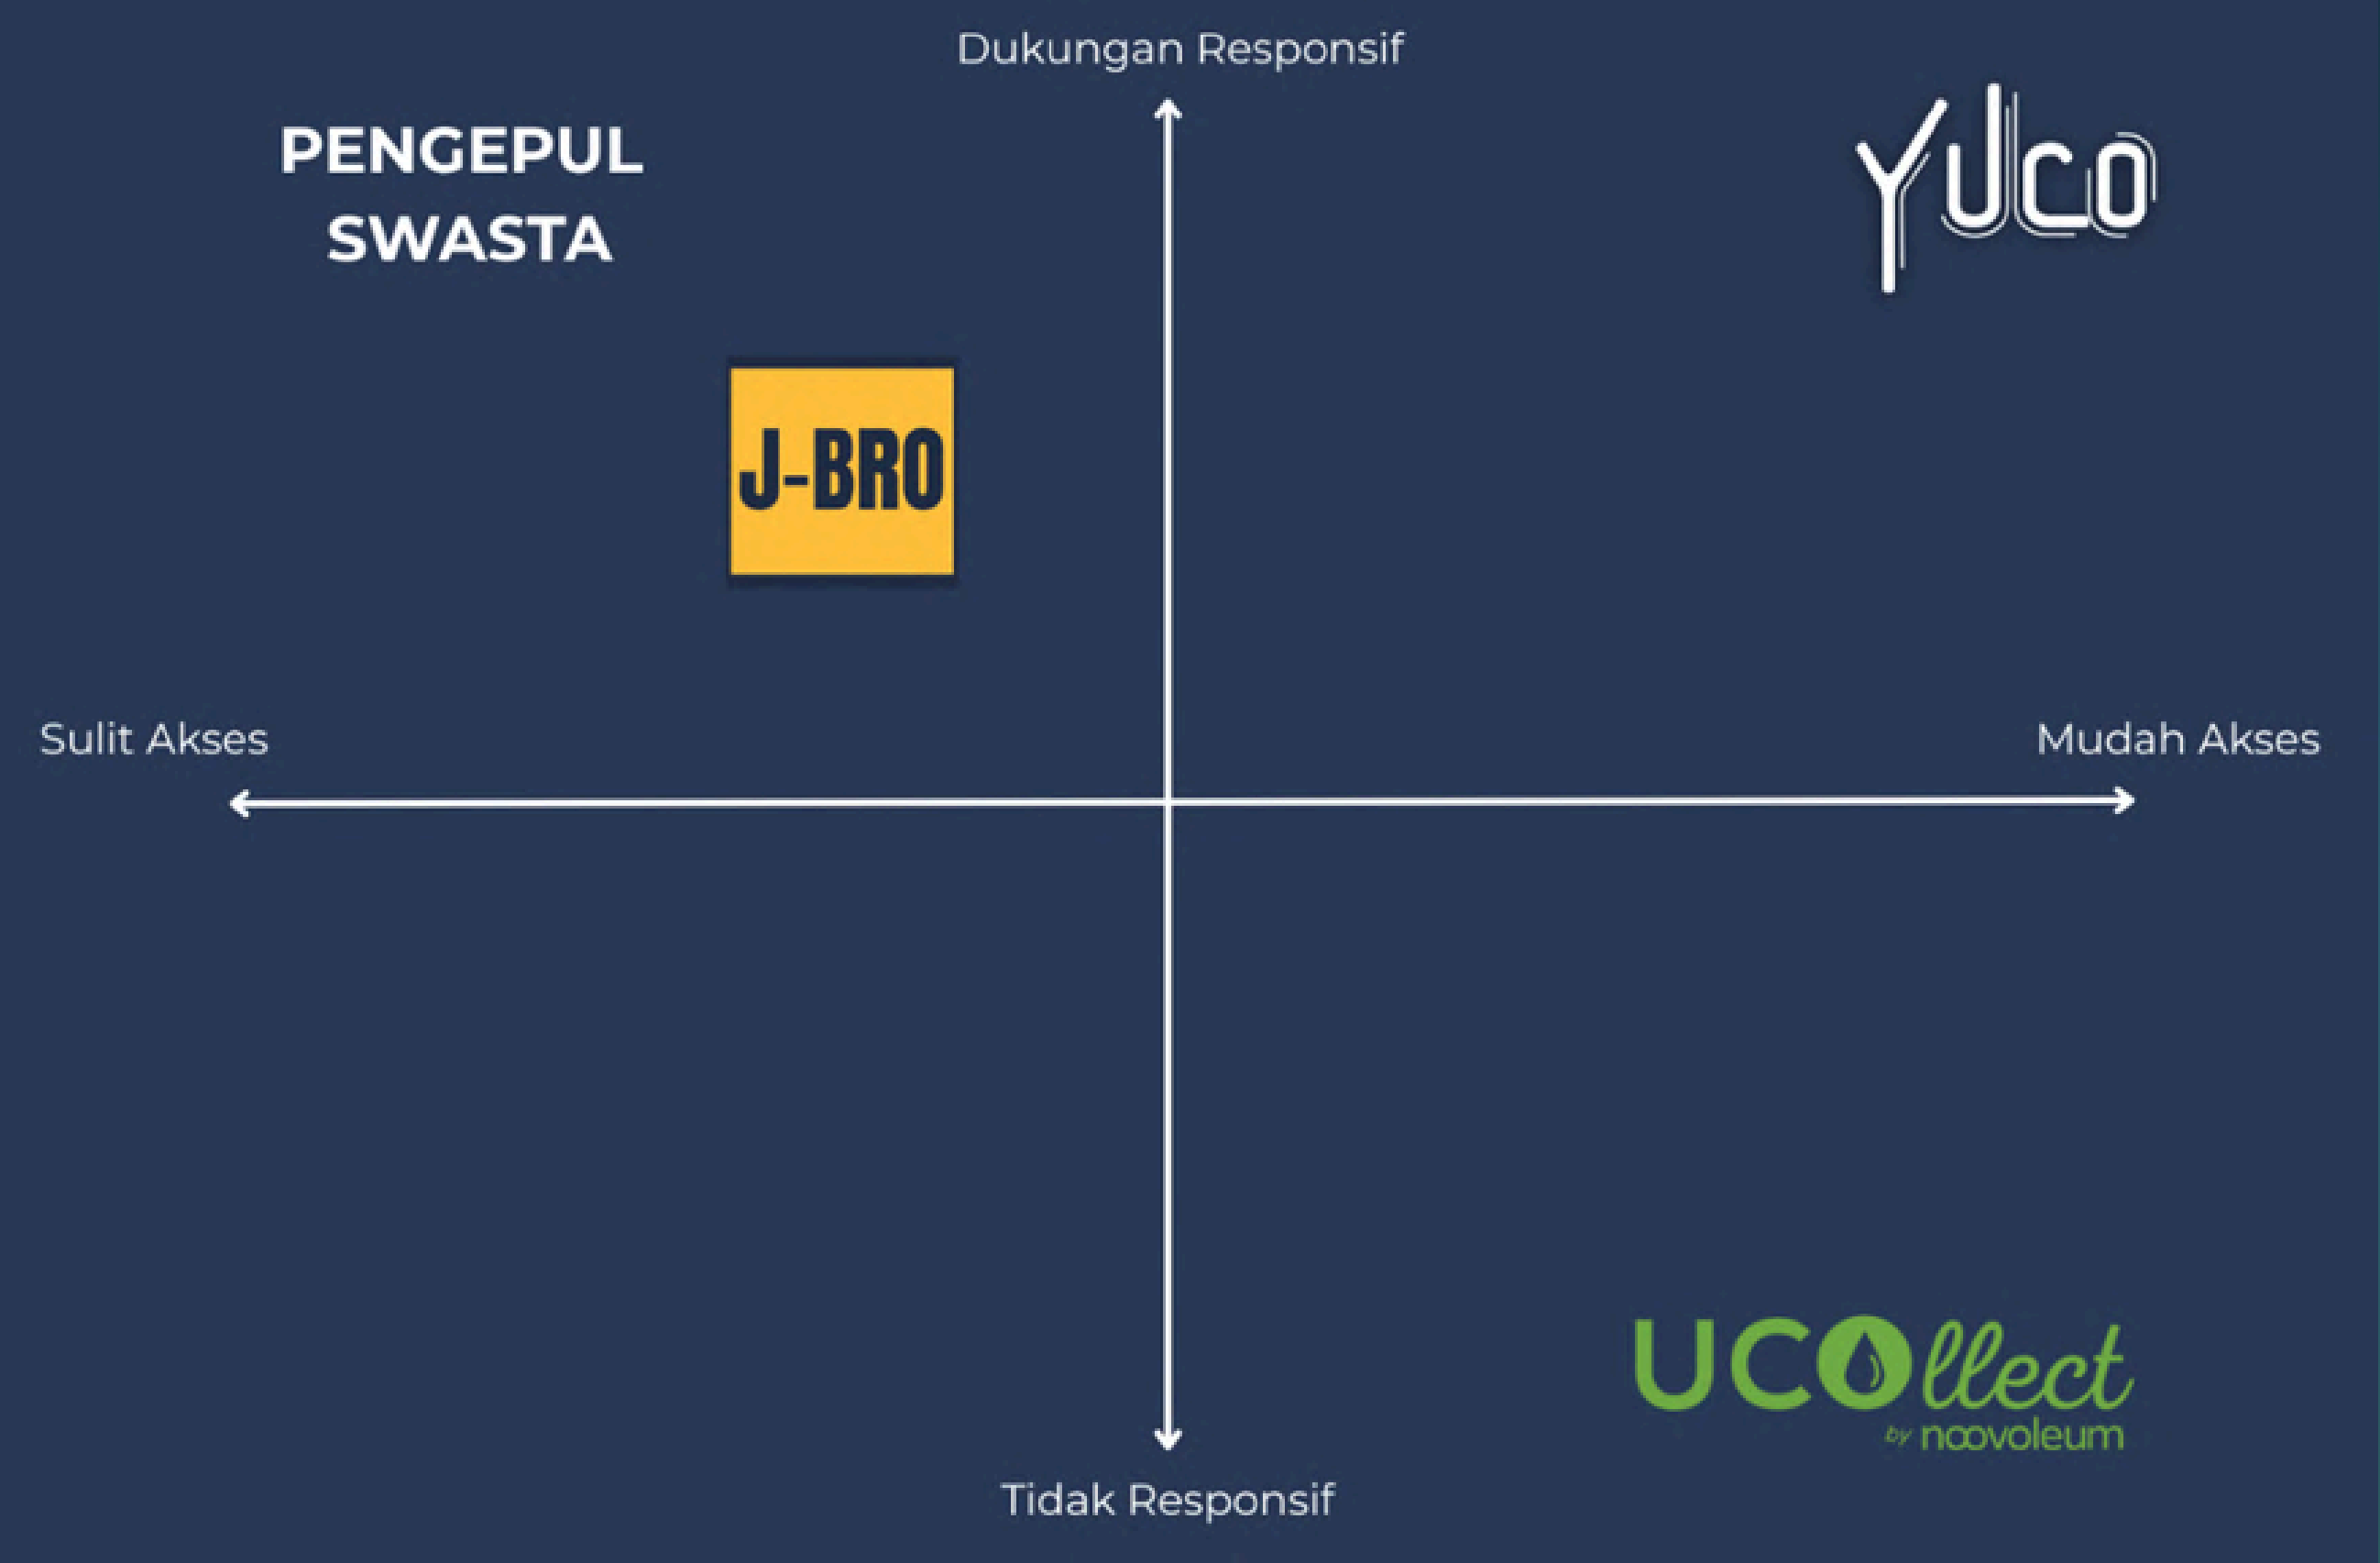

- Kebijakan ketat pemerintah terhadap pengumpulan, transportasi dan pengumpulan limbah B3 termasuk UCO
- Kebijakan standar nasional dan internasional produk eco-friendly dan biodiesel yang berbahan dasar UCO

Threats of New Substitute

Low

- Harga UCO di pasar global memengaruhi biaya produksi dan harga jual produk YUCO.
- Tingkat inflasi memengaruhi biaya operasional dan nilai insentif bagi masyarakat.
- Peningkatan aktivitas ekonomi terutama sektor Horeka meningkatkan pemasokan UCO

APPENDIX 5: Map Positioning

APPENDIX 7: Go To Market Strategy

Go-to-Market Strategy

Key Insight	YUCO Value Proposition, YUCO Target Audience, YUCO Main USP, Audience Touchpoint, Benchmark Activities
Key Message	YUCO sebagai platform inovatif yang mempermudah pengolahan limbah minyak jelantah menjadi produk ramah lingkungan
Triggered Pain Points	Minyak jelantah sering dibuang sembarangan, mencemari tanah dan air. Masyarakat kesulitan mencari cara yang tepat untuk membuang minyak jelantah secara berkelanjutan. Adanya kebutuhan akan produk sehari-hari yang lebih bertanggung jawab terhadap lingkungan.
